

FTK IMAGER

Ftk imager

- ▶ Ftk imager is a tool used to make an exact copy of data of the original data and the original data remains untouched and the copy made is used in investigation
- ▶ It creates a bit-for-bit copy of a device meaning it will copy everything including deleted and hidden files.

WHY USE FTK IMAGER?

- ▶ **Disk cloning-bit–bit stream**
- ▶ Step 1- Download free version of ftk imager from access data
- ▶ Step 2- attach a usb drive .add evidence in that drive
- ▶ Step 3 then to go to disk imaging
- ▶ Step 4 find logical and physical drive

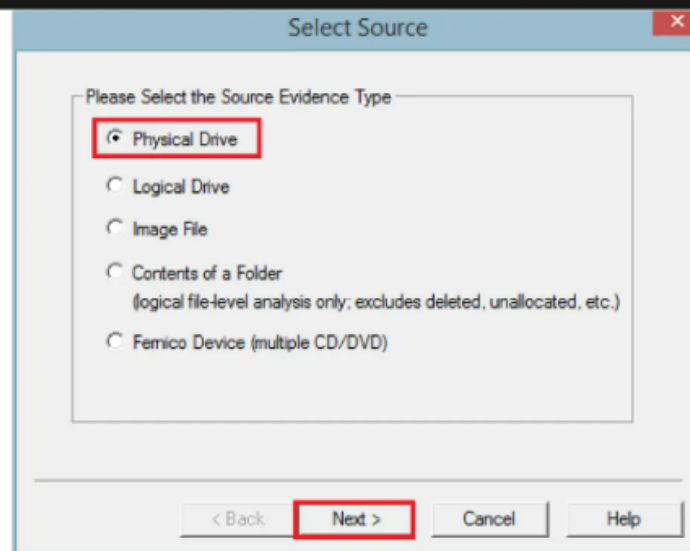

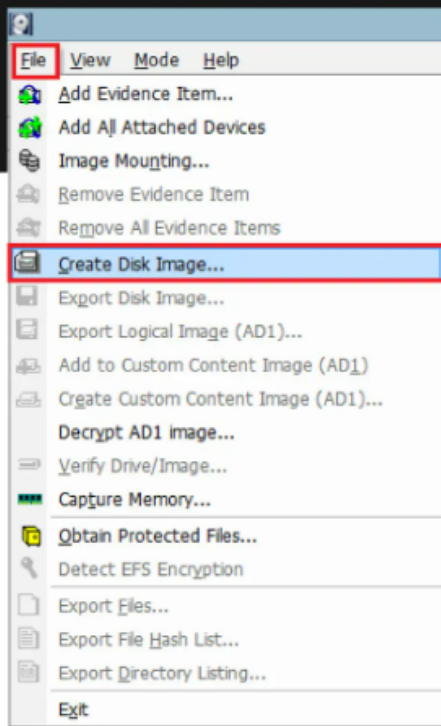

Working

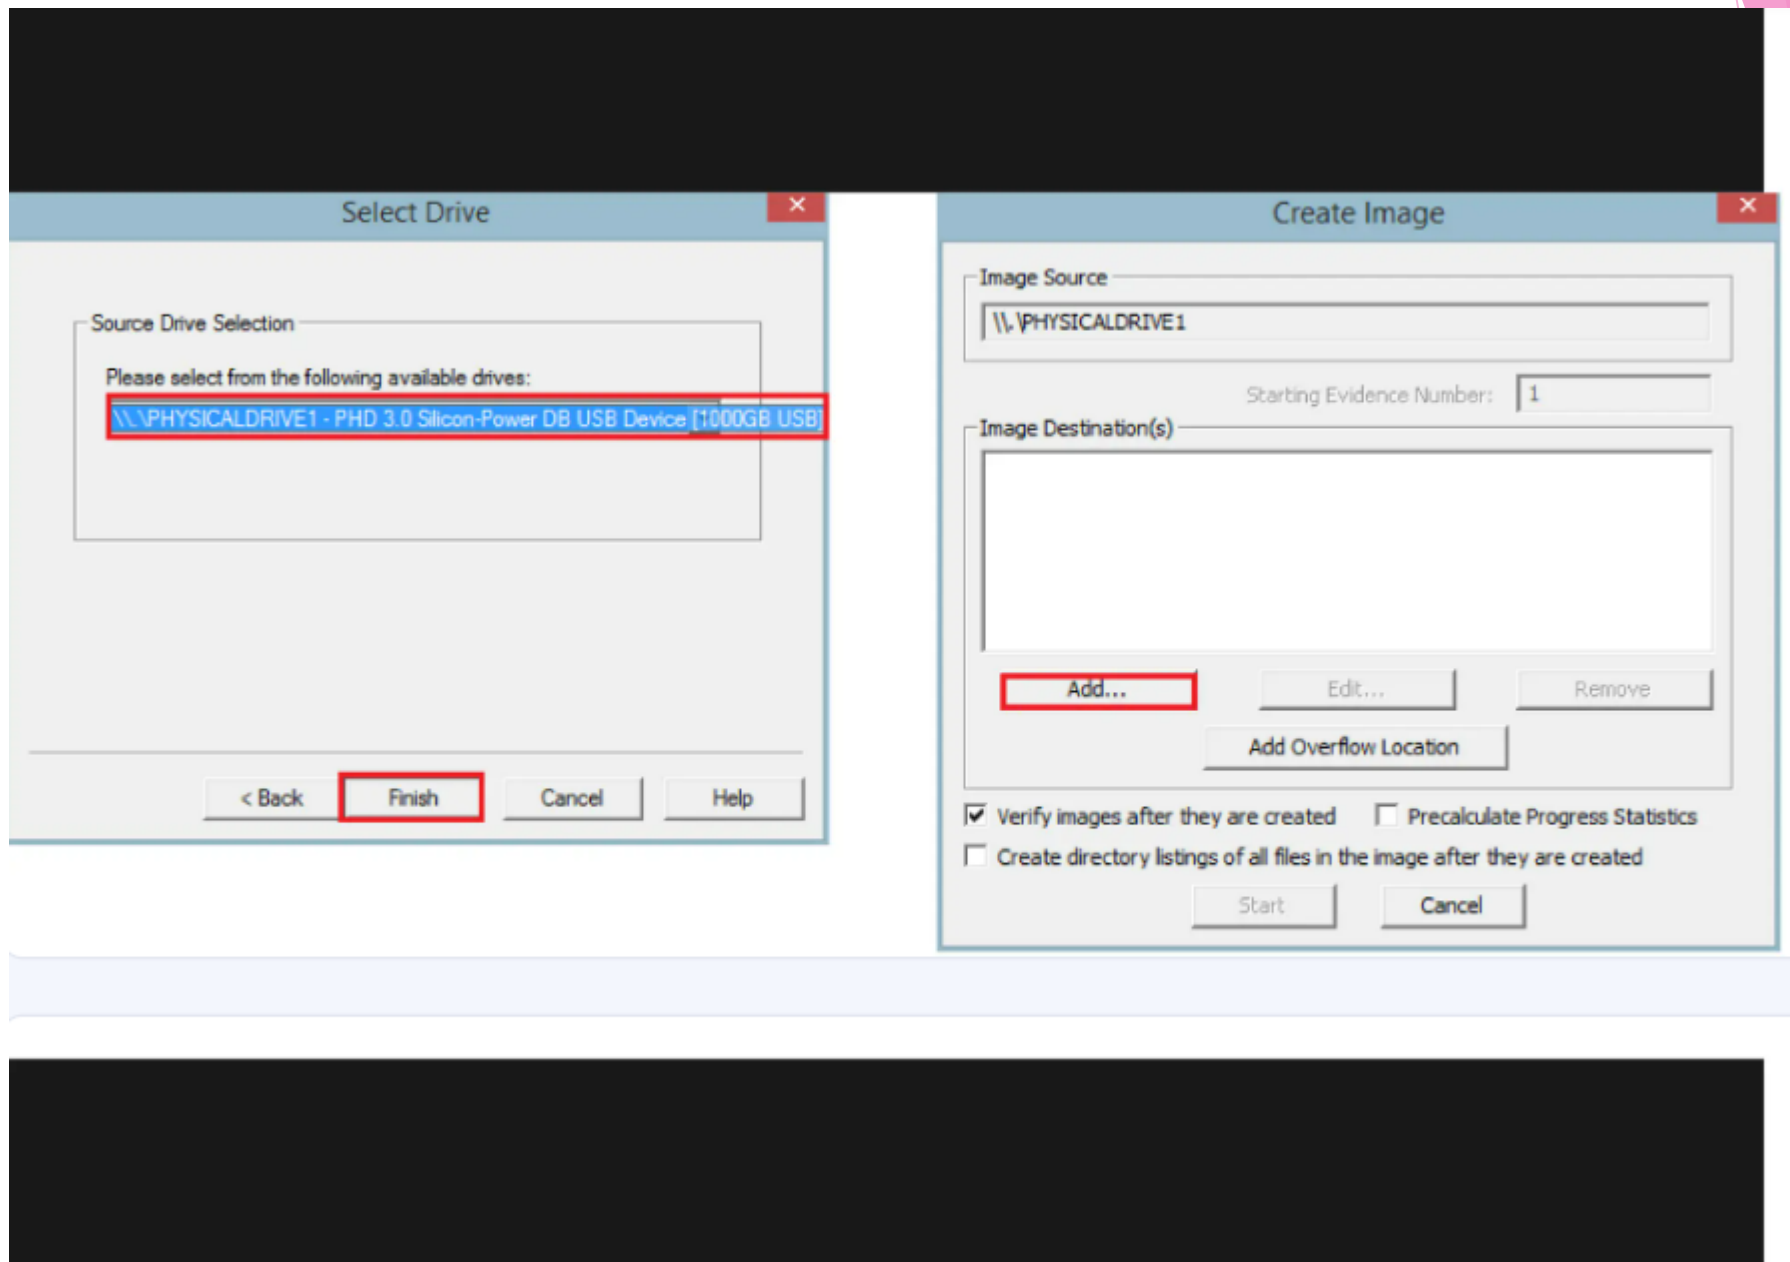

Step-By-Step

- After downloading and installing from [here](#), open FTK Imager by right-clicking and selecting “run as administrator”
- To perform a physical acquisition, select “File” then “Create Disk Image”
- Select “Physical Drive” and click “Next”
- First make sure the drive you want to image is connected to the computer via “Disk Manager” then in FTK Select the drive you want to acquire and click “Finish”
- A new window will appear. Select “Add” and select “E01” and press “Next”
- Fill out the case information as well as a description of the evidence and press “Next”

Step-By-Step (cont.)

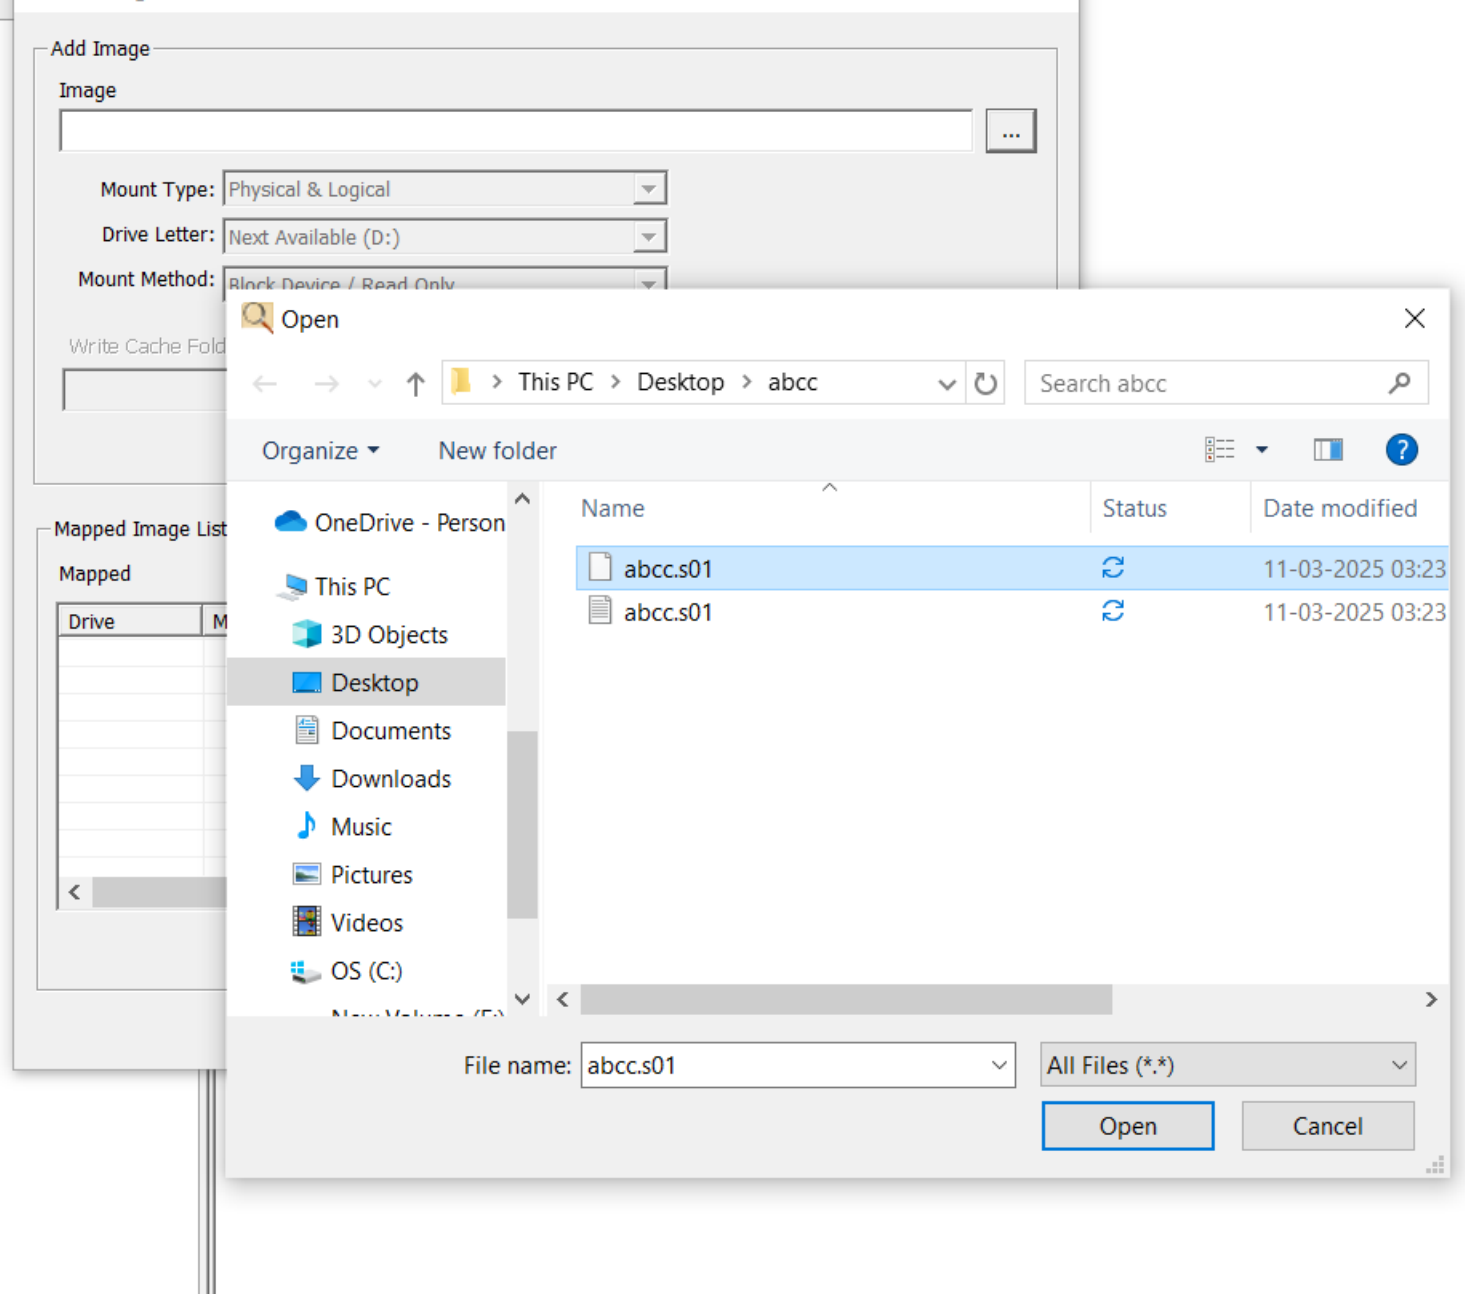

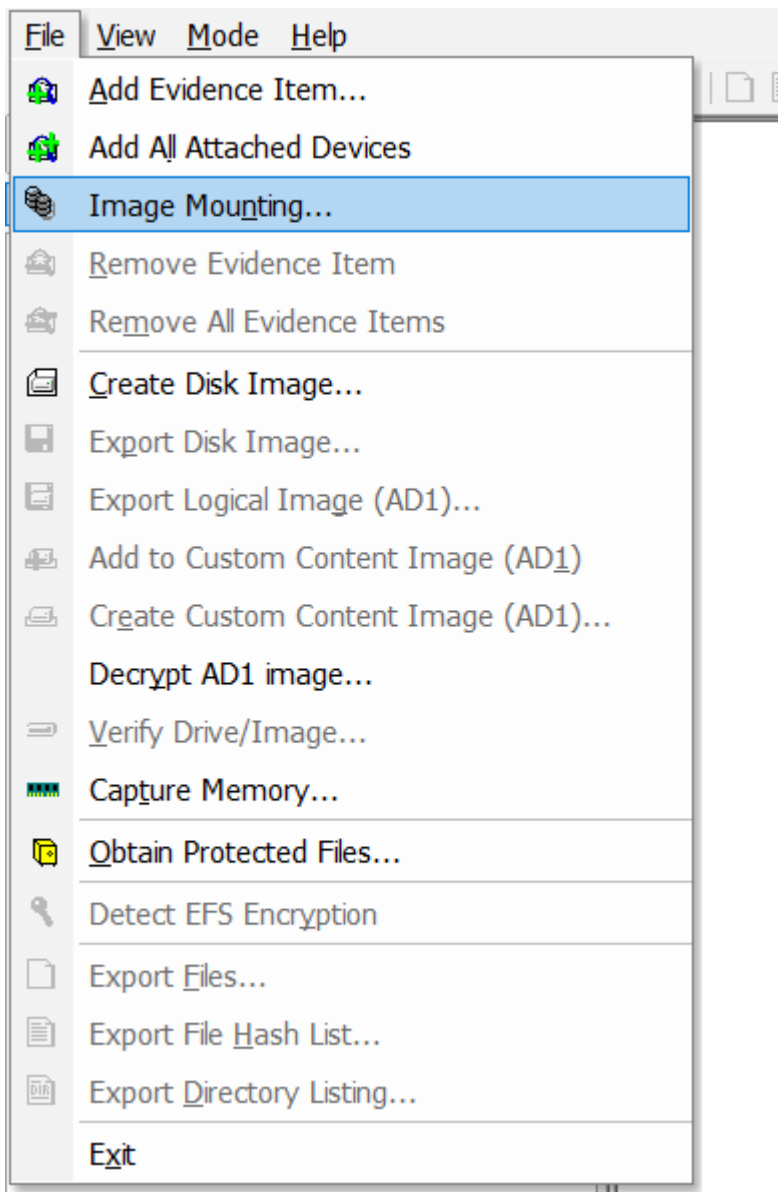

- Select the folder to save the Image to as well as input a Filename for the Image file.
- If you want the Image to be processed quickly make sure to put the compression at 0. However this will make the file size bigger. Keep this in mind. Also, FTK fragments files by default so if you simply want one large file set this number to 0. Otherwise, keep it at its default value.
- If you want to encrypt the file, select the box “Use AD Encryption”
- Then Select “Finish”
- Finally select “Start” to acquire the Image

How to mount a image

- 1.Open FTK Imager** → Go to **File** → **Image Mounting**.
- 2.Select the Image** → Click **Mount Image** and browse for the disk image (e.g., .E01, .DD).
- 3.Choose Options** → Select the partition, ensure **Read-Only** mode, and assign a drive letter.
- 4.Analyze the Image** → Access it via **File Explorer** for examination.
- 5.Unmount** → Return to FTK Imager and select **Unmount** when done.

Mount Image To Drive

Add Image

Image

C:\Users\ALISHA\OneDrive\Desktop\abcc\abcc.s01

Mount Type: Physical & Logical

Drive Letter: Next Available (F:)

Mount Method: Block Device / Read Only

Write Cache Folder:

C:\Users\ALISHA\OneDrive\Desktop\abcc

Mount
